Dear Friend/s,

Kaziranga National Park lies in Assam. It covers an area of 430 Sq. Kms. along the river Brahmaputra on the North & the Karbi Anglong hills on the South. It is a world heritage site and famous for the Great Indian one horned rhinoceros. The landscape of Kaziranga is of sheer forest, tall elephant grass, rugged reeds, marshes & shallow pools. It has been declared as National Park in 1974. It is also one place where the last few TIGERS in the world survive.

It is one of the last areas in eastern India undisturbed by a human presence. It is inhabited by the world's largest population of one-horned rhinoceroses, as well as many mammals, including Tigers, Elephants, Panthers and Bears, and thousands of birds. As per count in the year 2000 there are officially 86 TIGERS in Kaziranga.

Pugmarks – The Nature Club invites you to join us for a 5D/4N trip to a Kaziranga National Park in February 2010.

Dear Friend/s,

Manas National Park was declared a Project Tiger Reserve in 1973, a UNESCO World Heritage Site in 1985, and because of its beauty and importance to the environment was made a Biosphere Reserve in 1989. It is indeed breathtakingly beautiful. Bounded by Himalayan foothills, the dense jungle forest alternates with alluvial grasslands and Assam valley semi-evergreen forests, providing a rich wilderness for a great variety of wildlife, including many endangered species. The Tiger Project reserve extends over an area of 2837 square kilometres with a core area of 519 sq. kms. This is the Indo-Bhutan international border. Three unique residents of Manas are the rare Pygmy Hog, the Hispid Hare and the Golden Langur, and the park is a haven for no less than 20 highly endangered species. The diverse animal population of Manas includes some fierce or potentially aggressive creatures such as Tigers, Elephants, Indian one-horned Rhinoceros, Golden Cat, Fishing Cat, Wild Buffaloes, Leopards, Clouded Leopards, Civet Cat, Wild Dog, Indian Fox, Gaur and Himalayan Black Bear, as well as more timid creatures such as many varieties of deer.

Pugmarks – The Nature Club invites you to join us for a 4D/3N trip to a Manas National Park in February 2010.

Our abode there is a Lodge and it is 176 km from Guwahati and takes 4 hours by road. Situated in prime position right at the entrance to the national park, with tea gardens on one side, jungle and views of the Himalayan foothills on the other. The 16 large twin-bedded rooms all have attached bathrooms and the Lodge is simply but comfortably furnished. The Lodge also has electricity. There is a welcoming atmosphere to the Lodge, which includes an attractive dining room and a lobby where you can relax on sofas, browsing through books from our library. In fine weather tables and chairs are set outside for breakfast and the spacious grounds are fast becoming a delightful garden in which to stroll. Each bedroom has comfortable twin beds, a writing-cum-dressing table, cane chairs to relax in, and good hanging cupboard space, while the bathrooms have excellent hot and cold showers with basin and w.c.

Activities & Amenities at the resort include – Elephant Safari, Jeep Safari, Nature Treks, Birding Trails, Rafting, Visits to Bodo Villages, excursions to the tea garden or local village; tribal dance performance at the Lodge for groups etc
